

## MicroSD Card Formatting Instructions

For all microSD cards larger than 32 GB, formatting to the FAT32 file system is required to ensure compatibility with the 2WIN.

Please follow the steps below:

1. Download the FAT32 formatter application from our website.
2. Open the application and select the correct drive corresponding to your microSD card.
3. Leave the "Allocation Unit Size" setting at its default value.
4. Ensure the "Quick Format" option is selected.
5. Click "Start" to begin formatting.

**IMPORTANT:** Do **not** format the C drive!
